

Q.C.C.S We are Professional Hose Crimping Solutions.  
Hydraulic & A/C Hose Crimping Services  
Precision. Strength. Reliability.  
When it comes to fluid transfer systems, every connection matters. Our Hydraulic Hose Crimping and A/C Hose Crimping services are designed to deliver secure, leak-proof, and long-lasting hose assemblies for a wide range of industrial, automotive, and commercial applications.

The Future of crimping & connections for  
Equipment & Tractors

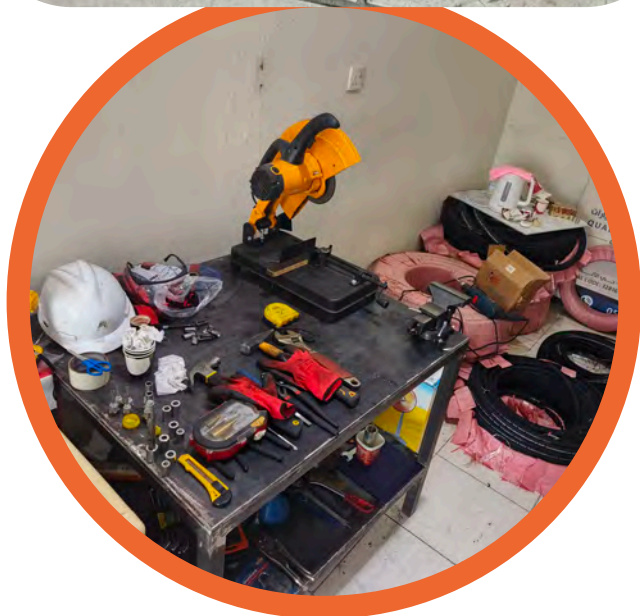

# Unmatched Performance in Heavy Equipment

Our Services Include:

- Custom hydraulic hose assembly
- High-pressure hose crimping
- Fitting replacement and installation
- Hose repair and maintenance

# Versatile Solutions for Hydraulic Crimping

- Leak-free, secure connections
- Designed for extreme pressure environments
- Compatible with a wide range of fittings and hose sizes
- Increased equipment reliability and lifespan.

The Future of crimping & connections for  
Equipment & Tractors

## Common Hose Types

- Braided hoses – Flexible and suitable for medium pressure
- Spiral hoses – Designed for high-pressure applications
- Thermoplastic hoses – Lightweight and chemical resistant
- PTFE hoses – High-temperature and chemical applications.

## Benefits of Proper Hydraulic Crimping

- Leak-free performance
- Increased safety
- Longer hose life
- Reduced downtime
- Better pressure handling
- Improved system efficiency

## Maintenance Tips:

- Inspect hoses for cracks or wear
- Check fittings for leaks
- Clean hoses regularly
- Store hoses away from sunlight and chemicals
- Replace old assemblies before failure
